Being Creative makes you Think

If "Senior Moments" gets you to smile or nod, ~~then~~ it's good. Creating is stimulating. Getting a new Idea turns us on. All I have to do is direct my attention to creating, and I produce. I always carry a pencil and paper with me wherever I go.

In a fleeting second I could look at an existing product, and my mind turns to constructive change. Just for the fun and novelty. I usually come up with something new. It does not have to be practical. Let the innovative master minds develop it further.

It pleases me, and it could please you very easily.

I know that there is some merit to my thousands of Original Ideas. Those who are gifted with their hands and inventive can carry the ideas forward.

Those who are handicapped, in a nursing home, confined to their homes -- or have idle time -- are now able to use their minds in a different way. Just by thinking novelty. Look at magazine and newspaper ads. Check your car over. Check out a new room as you enter. One after another. Surely you can think of a new slant, write it down, collect them. It will occupy you mind and bring you comfort.

These ideas are all new to me, and there was never my intent to use someone else's creations. So use them if you wish, they are Free from me to you. But if you want to produce any one or more of them, please go thru the proper procedure to achieve them as your own.
